

Bitcoin Capital Active ETP is the world's first actively managed Exchange Traded Product featuring cryptocurrencies as the underlying asset class. The investment product allows retail and institutional investors in Switzerland and, after approval of the prospectus in the EU, across selected EU jurisdictions to invest in digital assets as safely and as easily as buying ordinary shares. The product is issued by Bitcoin Capital AG and managed by FICAS AG, the Swiss based crypto investments management boutique. Its investment objective is to increase the NAV by trading Bitcoin against carefully selected altcoins (top 15 coins) and moving to Fiat when this is deemed the best option. The allocation is discretionary and based on in-depth investment research, technical and fundamental analysis, proprietary algorithms and artificial intelligence applications. BTCA provides investors access to a diversified, discretionary managed and liquid crypto portfolio. BTCA is actively risk managed and operates in a regulated and secure environment.
