This Key Information Document was last updated on 07/03/2022.

Warning: you are about to purchase a product that is not simple and may be difficult to understand.

What is this product?

Type:

This product is a non-interest bearing note payable to the bearer under Swiss law, fully secured by holdings in 15 FiCAS Active Crypto ETPs (BTCA). This product is listed on the following stock exchanges: SIX Swiss Exchange, Börse Stuttgart, Wiener Börse. It may also be admitted to trading on other regulated markets and over-the-counter markets.

Objectives:

This product offers investors access to a diversified, discretionary managed and liquid crypto portfolio. The crypto portfolio consists of the 15 largest cryptocurrencies by market capitalization. The following website can be used as a reference: <https://coinmarketcap.com/coins>. The crypto security is backed and collateralized by underlying assets of the product.

Price data from CryptoCompare, an independent global market data provider on cryptocurrencies, is used to calculate the price of the reference asset.

Units are issued directly to Authorized Participants against surrender of the underlying assets. Authorized Participants are organizations that have the right to create or redeem shares in an ETP.

Retail investors can buy and sell the securities exclusively on the secondary markets in conventional equity markets. They may also request redemption of the product against fiat currency (in CHF) from the issuer on the anniversary of the issuance program. All assets relating to the securities are secured by pledge to a security trustee acting on behalf of the investors. An independent administrator has been appointed by the issuer as collateral trustee to hold the security interests, for the underlying assets deposited with the custodians, on behalf of all current and future product holders.

Intended investor:

This product is a complex product suitable only for sophisticated retail investors:

1. who are able to bear a total loss of the investment, who are not seeking to preserve capital and who do not intend to secure a capital guarantee;
2. who have specific knowledge and experience of investing in similar financial products and markets;
3. who are looking for a product offering exposure to the underlying asset and have an investment horizon compatible with the recommended holding period set out below; and;
4. who are aware that the value of the product may fluctuate significantly due to the volatility of the underlying asset.

Maturity:

The product is open-ended. However, the issuer reserves the right to terminate and redeem the product at the issuer's sole discretion and in certain specified circumstances, in each case without any further prior consent of the Investors, by publishing a termination notice (specifying the redemption date) in accordance with the Terms and Conditions.

What are the risks and what could I get in return?

Risk Indicator

Lowest Risk

Highest Risk

The risk indicator is based on the assumption that you hold the product for the recommended holding period. The actual risk may differ significantly and if you terminate the investment prematurely, you may get back less. The overall risk indicator helps you assess the risk associated with this product compared to other products. It shows how likely you are to lose money on this

product because markets move in a certain way or we are unable to pay you.

This product does not include protection against future market developments, so you could lose some or all of the capital you have invested. We have classified the product as Class 7 out of 7, which is the "highest" risk class. This classifies the risk of potential losses from future performance as very high. Unfavorable market conditions have a high probability of affecting the possibility that you will receive a positive return on your investment. If we cannot pay you what you are entitled to, you could lose all the capital you have invested.

Please note the currency risk. You will receive payments in another currency, so your final return will depend on the exchange rate between the two currencies. This risk is not taken into account in the indicator given above.

Performance Scenarios

Investment of CHF 10,000		1 year	2 years
Stress scenario	What you could get back after deducting costs Average return each year	0 CHF -100%	0 CHF -100%
Unfavourable scenario	What you could get back after deducting costs Average return each year	6'000 CHF -40%	3'600 CHF -40%
Moderate scenario	What you could get back after deducting costs Average return each year	17'000 CHF +70%	28'900 CHF +70%
Favourable scenario	What you could get back after deducting costs Average return each year	34'000 CHF +240%	74'800 CHF +120%

This table shows how much you could get back after 1 year under different scenarios if you invest CHF 10,000. The scenarios presented show how your investment could perform. You can compare these scenarios with those of other products. The scenarios presented are an estimate of future performance based on evidence of past performance of this investment and as such are not an exact indicator. The amount you actually receive depends on market movements and how long you hold the investment. The stress scenario shows what you could get back in extreme market conditions and does not take into account the situation where we would not be able to repay the amount to you. The figures shown include all the costs of the product itself, but may not include all the costs you have to pay to your adviser or distributor. These figures do not take into account your personal tax situation, which may also affect the amount you get back.

What happens if Bitcoin Capital AG is not able to pay out?

If the issuer is unable to make the payment, you may incur a financial loss. This loss may be partially offset by amounts due to you after realisation of the collateral. For more information on what to do in the event of default or bankruptcy, please refer to the prospectus. There is no compensation or guarantee system that could cover all or part of this loss.

What will this investment cost me?

The reduction in yield (RIY) illustrates how the total fees you pay affect the investment return you could get. The total cost includes one-off, ongoing and additional costs. The amounts shown here represent the combined cost of the product for the recommended holding period. The figures given assume an investment of CHF 10,000. The figures are estimates and are subject to change in the future.

Table 1: Ongoing costs

The person who sells you the product or advises you on it may charge you additional fees. In this case, they will inform you of these fees and show you how all costs will affect your investment over time.

Investment of CHF 10,000	If you redeem after 1 year	If you redeem after 2 years (recommended holding period)
Total costs (in CHF)	240	480
Reduction in yield (RIY) per year	2.4%	2.4%

Table 2: Breakdown of costs

The table below shows:

- The impact of different types of costs on the return you could achieve at the end of the recommended holding period;
- What is included in the different cost categories.

One-off costs	Entry costs	0.00%*	The impact of the costs you have to pay when you make your initial investment. [Maximum costs are given, but you may pay less]
	Exit costs	0.00%*	The impact of the costs incurred if you withdraw the investment when it matures.
Operating costs	Portfolio transaction costs	Up to 0.4%	The impact of the costs of buying and selling the underlying assets of the product.
	Other operating costs	2%	The impact of the costs we deduct each year for managing your investments.
Additional costs	Performance fees**	20%	A performance fee is payable if the portfolio value exceeds the minimum profit threshold (High-Water Mark).

*Retail investors who purchase the product on the secondary market conclude trades directly with a participating broker or via an exchange and therefore additional costs may apply. These costs are publicly available on stock exchanges on which the product is listed or can be requested from online brokers.

** Please note that other ongoing costs and performance fees are already included in the NAV/market price.

How long should I hold it and can I withdraw my money early?

Recommended holding period: 2 years

This product has no required minimum holding period. You can sell your investment in the product without penalty on a regulated market where it is listed.

How can I make a complaint?

If you wish to complain about the sale of the product, you should address your complaint to your intermediary or distributor. If you wish to complain about other aspects of this product:

(1) you may email the issuer at the following address: info@bitcoincapital.com.

(2) you may send your complaint in writing to the issuer at the following address: Gubelstrasse 24, 6300 Zug, Switzerland.

Filing a complaint does not affect your right to take legal action.

In the event of a dispute, please contact our ombudsman's office: FINOS AG, info@finos.ch, +41 44 552 08 00

Other relevant information

We are required to provide you with other documents, such as the latest product prospectus and the annual report. You can obtain these documents and other product information online at www.bitcoincapital.com or by sending an email to the issuer at info@bitcoincapital.com.

The products are exchange-traded products that do not qualify as units of a collective investment scheme according to the relevant provisions of the Swiss Federal Act on Collective Investment Schemes (CISA), as amended, and are not licensed under this Act. The products are therefore not governed by the CISA, nor are they supervised or approved by the Swiss Financial Market Supervisory Authority (FINMA). Consequently, investors do not benefit from the specific investor protection provided by the CISA.
